

# Tools

## Visual Studio Code

- `.md` 확장자로 파일 생성
- extensions를 설치해서 미리보기 사용

# Usage

## Github README.md

- 깃허브에서는 마크다운 파일을  
보기 좋게 스타일링해서  
문서를 확인할 수 있음

README.md

### Bootstrap Ruby Gem build passing gem v4.1.1

[Bootstrap 4](#) ruby gem for Ruby on Rails (Sprockets) and Hanami (formerly Lotus).

For Sass versions of Bootstrap 3 and 2 see [bootstrap-sass](#) instead.

#### Installation

Please see the appropriate guide for your environment of choice:

- [Ruby on Rails 4+](#) or other Sprockets environment.
- [Other Ruby frameworks](#) not on Rails.

##### a. Ruby on Rails

Add `bootstrap` to your Gemfile:

```
gem 'bootstrap', '~> 4.1.1'
```

Ensure that `sprockets-rails` is at least v2.3.2.

`bundle install` and restart your server to make the files available through the pipeline.
